# Pioneering Excellence in Multi-Disciplinary Building Services Design

## goldfish & bay<sup>TM</sup>

In the ever-evolving landscape of construction and engineering, where precision and innovation are non-negotiable, Goldfish and Bay Engineers stand out as a beacon of top-tier performance.

Established in 2020, our firm has rapidly ascended to the forefront, reshaping the realm of multi-disciplinary building services. Specialising in fire, electrical, mechanical, hydraulic, vertical transportation, civil, and ASP3 services, Goldfish and Bay Engineers epitomise a revolutionary approach to engineering, setting the company apart from the competition.

Our journey commenced with a vision to infuse the engineering sector with a breath of fresh air. Despite the company's relative youth, our team comprises seasoned engineers meticulously handpicked from across the country. This fusion of experience and enthusiasm forms the backbone

of Goldfish and Bay Engineers, enabling us to offer unparalleled services to the industry.

At Goldfish and Bay Engineers, we pride ourselves on being the ultimate solution for all building service engineering needs. Our expertise spans various disciplines, ensuring comprehensive and integrated solutions for our clients. Whether it's designing cutting-edge fire protection systems, implementing state-of-the-art electrical solutions, or crafting innovative hydraulic systems, our team excels in every facet of building services engineering. Notably, our services coordination team and digital engineering capabilities stand out as particular strengths, distinguishing us from our competitors.

While our capabilities extend across diverse sectors, such as commercial, healthcare, and education, we place a special emphasis on the

residential domain. Recognising the unique challenges of residential projects, our approach is tailored to address these intricacies. From conceptualisation to execution, we offer end-to-end solutions prioritising safety, efficiency, and sustainability in residential developments. With the need for housing in the ever-growing Australian economy, we are also exploring innovative approaches to modular and eco-friendly residential construction, aligning with contemporary environmental considerations.

At the core of Goldfish and Bay Engineers lies an unwavering passion for engineering. We firmly believe that genuine enthusiasm for the craft births true innovation. This passion drives us to constantly push boundaries, explore new technologies, and stay at the forefront of industry trends. Engineering is not merely a job for us; it's a calling - a commitment to excellence that permeates every project we undertake.

This commitment to excellence is manifested in the unparalleled service we provide. Acknowledging the uniqueness of each project, our team approaches every task with a fresh perspective. Beyond our current focus, we are

considering expanding our services to incorporate sustainable design practices, emphasising green building solutions, and energy-efficient designs - aligning with the growing global emphasis on environmental consciousness.

Goldfish and Bay Engineers take pride in our advanced value engineering approach. Beyond offering solutions, we optimise them. Our team meticulously analyses every aspect of a project to identify opportunities for cost savings, efficiency improvements, and enhanced performance. This proactive approach not only adds value to the project but also positions us as a forward-thinking engineering firm.

In the constantly evolving landscape of building regulations and compliance standards, Goldfish and Bay Engineers stand tall as a bastion of excellence. Well-versed in the latest codes and regulations, our team ensures that every project complies with the highest standards of safety, quality, and environmental sustainability. Clients can trust us to navigate the complex web of regulations, providing peace of mind and confidence in the success of their projects.

“Standing out for the sake of being different is not the goal;  
striving to be better is the true essence of distinction”

– Fadi Taouk, Managing Director

Our phenomenal growth is a testament to our dedication and expertise. From a humble beginning with just two individuals four years ago, we have expanded our team to over 70 professionals across Australia and overseas. This significant expansion reflects not only our commitment to excellence but also the trust and confidence our clients place in our services.

Additionally, in our pursuit of excellence and expansion, we have proudly inaugurated a new office in Camperdown, NSW, complementing our existing head office, in Petersham, NSW. As part of our strategic growth plan, we are gearing up to extend our presence into Queensland, solidifying our commitment to serving clients across the nation.

Moreover, we are exploring collaborations with research institutions and universities to foster innovation in building materials and construction methodologies, ensuring we stay at the forefront of advancements in the industry.

Proactive investment into research, innovation, and development is a cornerstone of our philosophy, enabling us to offer both cutting-edge products and computational data-driven design solutions. We actively encourage developers to leverage new technologies throughout the design and construction phases, enhancing delivery, quality, and assurance while meeting the expectations of the Design and Buildings Practitioners Act. This commitment to technological advancement has been recognized through our engagement in multiple award-winning projects, including our collaboration with Deicorp on various Green Star certified developments.

Furthermore, we foster personal development and additional qualifications within our team, supporting young staff in pursuing various certifications and accreditations relevant to their respective engineering discipline. This dedication to professional growth extends to our commitment to developing future engineering talent. We actively participate in mentoring programs, internships, and educational initiatives to contribute to the next generation of engineers.

Goldfish and Bay Engineers represent the future of multi-disciplinary building services engineering. With a perfect blend of experience, passion, and innovation, our firm is well-positioned to shape the skylines of tomorrow.

As we continue to grow and evolve, our unwavering commitment to excellence remains the cornerstone of our success. We are open to exploring new partnerships and ventures that align with our mission of advancing excellence in building services design.
